

CPEW PLUS CERTIFICATION

*Certified in Professional Ethics at Workplace Plus
Program Recognised by the Government of India.*

WHAT IS **Clean Exit**

Clean Exit is an ethics and behavior rating platform for working professionals that reduces misconducts and frauds in the organizations. An initiative of Information Sharing and Analysis Center (ISAC), India's leading non-profit cyber security foundation and a public private partner with Government of India, Clean Exit was originally designed to rate cyber security professionals, ethical hackers under the National Security Database program and developers who work on sensitive assignments. Companies who implement the ethics program are able to build teams that uphold values, maintain their integrity and conduct themselves ethically in most stressful environments.

About the Course

This course ‘Professional Ethics at Workplace Plus Program,’ will teach you how influential organizational circumstances can push good people towards misconducts and unethical decisions.

This program aims to empower the participants to analyze the risks of unethical or illegal behavior triggered by severe circumstances. We will review some of the most prominent organizational scandals of the recent decades and understand the implications. Whenever we hear about ethical scandals, we assume that bad people do bad things. However, studies have shown that even people with a high level of integrity can break the rules if they face grave circumstances.

A better understanding of why good people make bad ethical decisions will enable you to protect yourself and your organization against decisions that can impact your career and someone’s life.
